

OPENING THE OBSERVATORY

- Unlock the door and enter. The alarm will start beeping.
- Immediately punch your access code into the control panel on the wall by the door to turn off the alarm.
- Sign in using the Log Sheets. The logbook is on the table by the water cooler. Additional copies of the log sheets are located in the top drawer of the Control Room filing cabinet.
- Turn off the West motion sensor lights. The switch is by the west outside door, marked 'Floods'.
- Turn on the exterior red lights. The switch is by the west outside door.
- Turn on the interior red lights.
- Install the red railing and pier lights.
- Turn on the building sign by activating the 'Projector' switch on the west wall near the computer.
- If it is too cold you can turn the furnace up a bit. The thermostat is on the south wall of the classroom.
- Fill the coffee maker and kettle. Plug them in.
- Turn on the sign located on the south wall beside the counter.
- Turn off the north motion sensor light. The switch is next to the north exit door.
- Turn on blue breakers 5 and 7 in the right-hand electrical panel located behind the bi-fold doors in the hallway leading to the dome.
- Turn on water pump breakers 12 and 14.
- Turn on the ASTRON 12 VDC power supply in the basement equipment rack.
